Dear PTTW Coordinator,

Re: EBR# 1A06E1293 - St Marys Cement Group Permit to Take Water Application

We are writing to you in support of the general concerns of the Balaclava School community. Water quantity and quality for the school is very important for the health of our students, staff and community visitors.

We would ask that you undertake a thorough evaluation of the PTTW application from St Marys Cement Group in light of the proximate location of our school to the proposed development and test site. Your assistance with this is appreciated.

Yours very truly,

Don Grant

Superintendent of Business and Treasurer

The Hamilton Wentworth District School Board
