

Your Commitment is Needed!

It is imperative that as a community, we stand together to show local and provincial governments that our community is not a suitable location for this quarry. We need to preserve our local environment, protect our drinking water, keep our roads safe and safeguard the investments that we have made in our homes and property.

This endeavour is going to require the pooled financial resources of our community and its residents. We need to retain our own experts to challenge the findings of Lowndes Holdings Corp. We need to hire leading environmental lawyers who can make our case to appropriate legal and government bodies.

It is estimated that the cost of taking this fight through all the necessary channels is going to exceed \$100,000 a year. This represents a pittance compared to what the quarry industry could be willing to spend to go forward with their proposal. Financial commitment is essential to ensure that we can shield ourselves from their substantial limestone extraction plans.

At the June 9, 2004 public meeting, residents committed \$500 each, to support this crucial cause. Some residents and local businesses have already committed \$5,000 each. We implore everyone to dig as deep as you can. The faster we can raise funds, the faster we can put a stop to this quarry proposal. This fight is about protecting our investment in our properties as much as it is about gaining assurance for our families that our environment will be protected from the adverse impacts of a quarry.

Kudos and thanks to our neighbours who have already made their financial commitment. To everyone... take a stand with your neighbours because together we can win this battle. Make your commitment today!
