

HRCA Bridges Master Plan Class EA Progreston Road, Structure 72 – Net Effects Evaluation Overview

Criteria	Alternatives				
	Do Nothing	Consolidate/Eliminate Structures	Establish Pedestrian Only Bridge	Repair Bridge	Replace Structure
Natural Environmental Considerations (Cold Water Stream)					
Hydraulic Considerations					
Social/Cultural Considerations					
Historical Considerations					
Economic/Financial Considerations					
Technical Considerations					
PRELIMINARY CONCLUSION	Does not address corrosion on railings.	Significant disadvantages to local residents and businesses related to loss of access	Significant disadvantages to residents and businesses relying on vehicular access	Addresses minor deficiencies (i.e. paint on railings) identified with minimal to no natural environmental, social/ cultural and economic impact.	Addresses all the existing minor structural deficiencies identified, however significant financial impact to the City. Bridge replacement is not warranted given minor defeceincies.
